

Bridge Wallboard Install

This document details the installation process for adding the Bridge Wallboard to your Microsoft Teams application.

First locate the sidebar. Clicking the three dots at the bottom will open a menu displaying your installed apps.

Next you will select the 'More apps' option at the bottom.

You will then select 'Upload a custom app'

The file explorer will open, and you will select the Bridge Wallboard application.

If you have any issues with this process or any questions you can contact
